pewag[®] Single Wheel Track Bars

A True All-Rounder that Can be Used Universally

Skidders are the ski racers of the forests: they are used in logging operations to remove cut trees as quickly and efficiently as possible from the cutting site, often having to make their way across rough terrain and coping with pronounced differences in altitude. To help them do their job properly, **pewag** has developed the single wheel track duro.

pewag Single Wheel Track

- **pewag** Single Wheel Track is suitable for skidders and universal use on all soil types
- Broad contact surface prevents machines from sinking
- Improved wear resistance and extended lifetime thanks to a special hardening process for the connecting elements
- Innovative starwave[®] profile stubs ensure optimum grip
- Prolonged lifespan thanks to pewag starwave[®] technology
- 4 horizontal welded-on starwave[®] stubs provide more stability and even traction
- Optimal tire protection from tree stumps and stones thanks to wide coverage

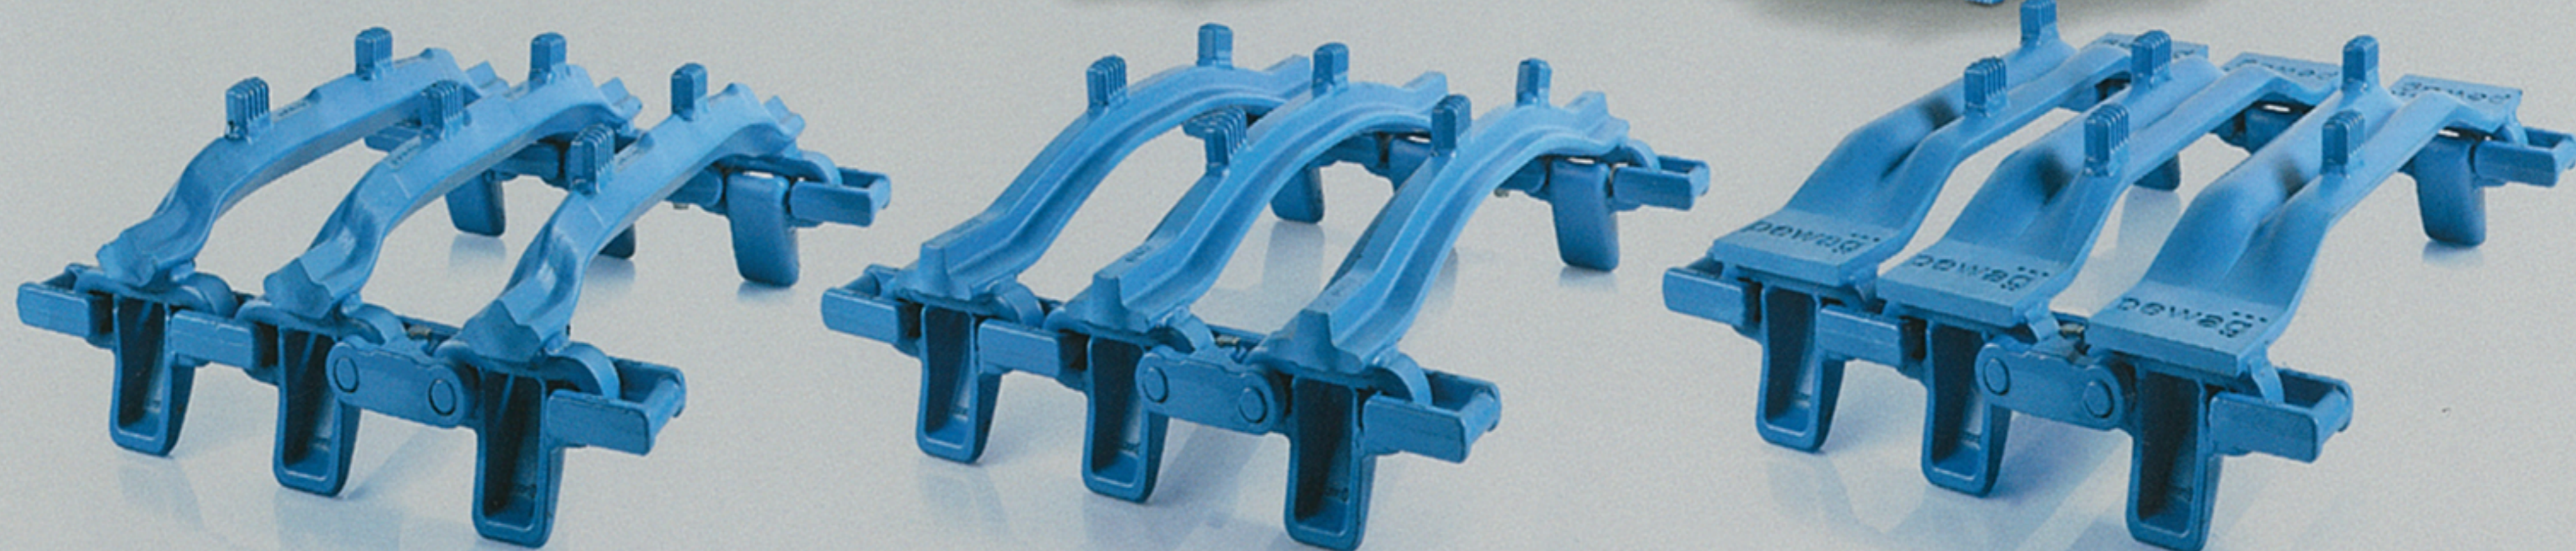

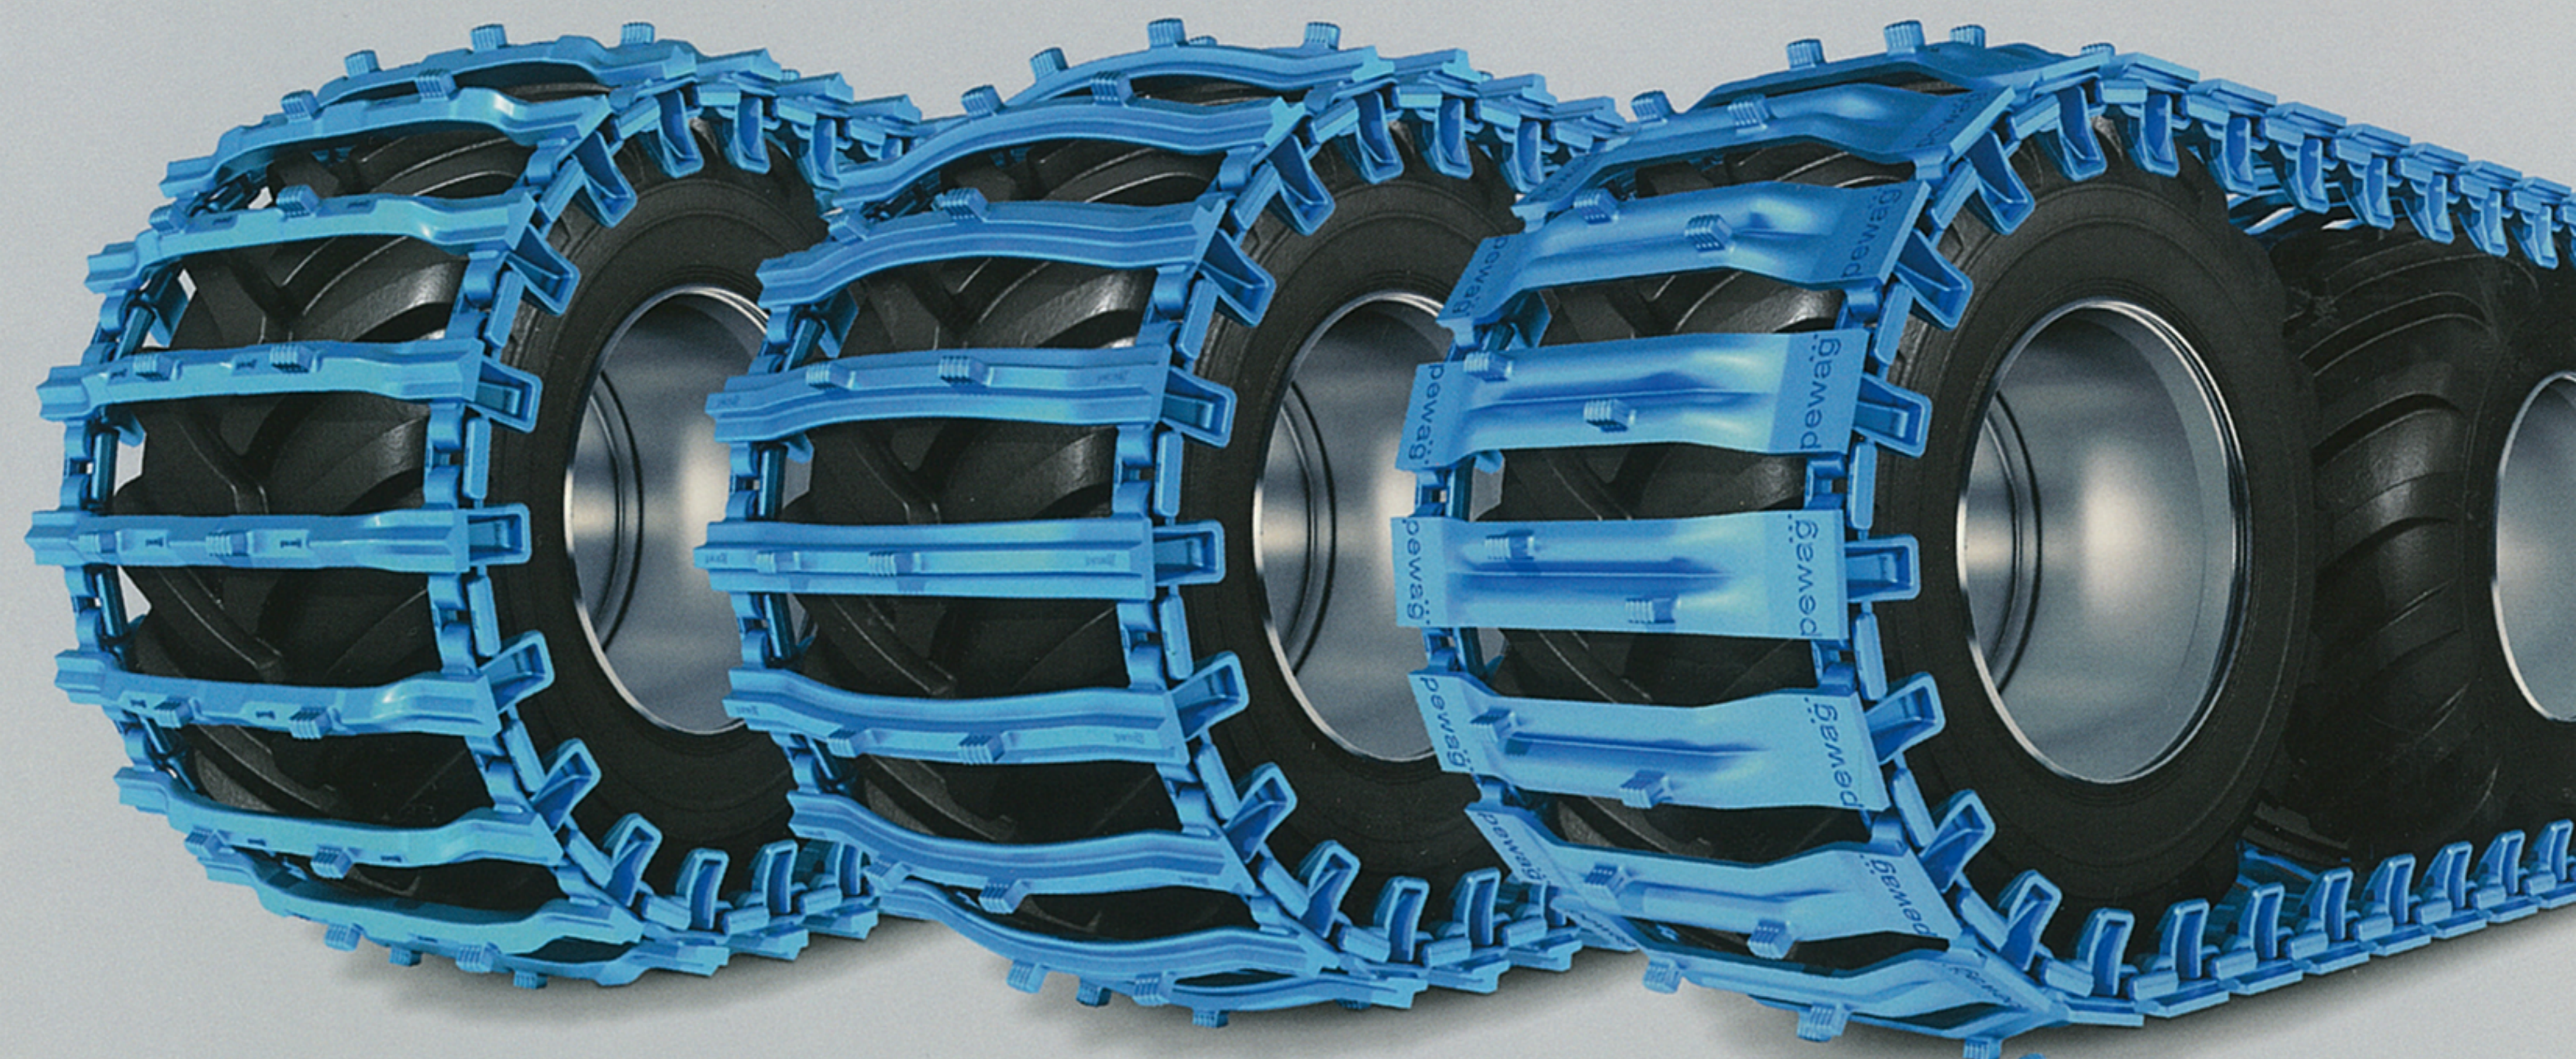

pewag bluetrack Traction Bars

Taking Traction to an Entirely New Level of Performance

The future of traction innovation with the "All New" **pewag** bluetrack. bluetrack is specifically made for hardcore applications. The combination of top-grade materials and decades long experience of our engineers in the forestry industry yields a product that know no compromise.

The unique track profile adjusts itself to the tire contour, thus increasing the cost effectiveness of the machine.

bluetrack perfekt

Ideal for steep, rocky territory

- Angle and radii of the **pewag** bluetrack perfekt bars are designed of optimum grip and the speedy removal of material from the tire tread
- Innovative starwave® profile stubs ensure high resistance and a long lifespan for heavy-duty applications

bluetrack duro

Universal all-round track for standard forestry requirements

- The wide support and rounded edges ensure a high level of soil protection
- Innovative mounting of the forged starwave® profile stubs ensures optimum grip

bluetrack flow

Suited for easy terrain and sensitive soil conditions

- Wide contact surface area prevents machinery from sinking
- Broad coverage area protects tires from tree stumps, branches and stones
- Also available with extended cross members for additional flotation
- Innovative starwave® profile stubs provide longer lifespan
