Forestry Tracks

## for Harvesters, Forwarders and Skidders

pewag
forestry

Taking Traction to an entirely new level of performance.

The future of traction innovation with the "all new" pewag bluetrack. bluetrack is specifically made for extreme applications. The combination of top-grade materials and decades long experience of our engineers in the forestry industry yields a product that knows no compromise. pewag tracks have superior wear resistance and extended lifetime thanks to a special hardening process for the connecting elements.

pewag bluetrack duo duro

The ultimate universal all-terrain track

- Innovative mounting of the forged starwave® profile studs ensures optimum grip
- Increases the resilience of lighter forestry machines
- Effortless operation on wet or rocky ground

760-950 mm
80-100 mm

| Traction | Rock / Stone / Clay / Mud |
| Flotation | Snow / Ice |

**starwave® Stud**

pewag's innovative starwave® profile studs owe their increased durability and grip to their unique grooved design. The ridges allow for a deeper case hardening, making them extremely wear resistant.
