The expert in steep terrain!

Traction

Rock/Stone/Clay/Mud

Snow/Ice

Flat Terrain

Maximum safety through increased traction and 360° stability on steep slopes.

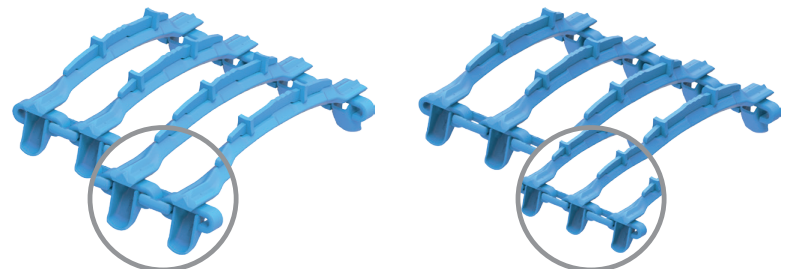

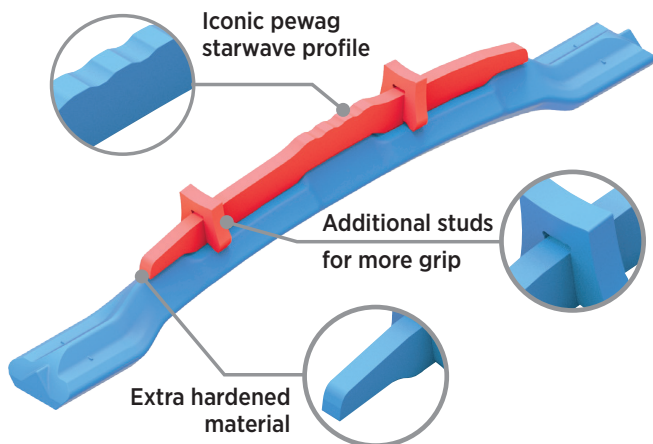

A longer service life due to larger wear volume and optimized wear resistant material

Additional strength for the heaviest machines and toughest condition.

perfekt extreme - Convinces where others reach their limits:

Thanks to the traction elements with incorporated studs, there is maximum grip on loamy/muddy soils as well as on snow and ice. The optimal fit of the tracks to the tire contour makes the machine very well maneuverable and also extends the life of the tires. The increased traction also leads to less slippage on extreme surfaces, resulting in fuel savings.
